

-Construction-Task

Civil Engineering: Residential Buildings Apartment blocks: Multi-unit residential buildings, usually several stories high, housing multiple families or individuals.

Image Annotation Project Construction Task (CVAT)

Overview

Task requirements

This task is to annotate objects in an image using the Shape tool.

Draw a tight bounding box around each individual building.

Class list

Residential Buildings:

Apartment blocks

Housing units under construction

Commercial Buildings:

Office blocks

Shopping or mixed-use structures

Industrial Buildings:

Warehouse

Factories or large-span structures

Minimum size for objects are 20×20 pixels.

Do not annotate images that are too far.

Labels:

1. Apartment Blocks (RB)
2. ■Housing units under construction (RB)
3. ■Office Blocks (CB)
4. ■Shopping or mixed use structure (CB)
5. ■Warehouse (IB)
6. ■Factories (IB)

Residential buildings (RB)

Commercial Building (CB)

Industrial Building (IB)

You need to do the following steps:

Go to <https://app.cvat.ai/> and log in. If you don't have an account, create one.

After authorisation, create a new task with the following parameters:

Name: Construction Task

Labels:

1. Apartment Blocks (RB)
2. ■Housing units under construction (RB)
3. ■Office Blocks (CB)
4. ■Shopping or mixed use structure (CB)
5. ■Warehouse (IB)
6. ■Factories (IB)

Residential buildings (RB)

Commercial Building (CB)

Industrial Building (IB)

Add images from the "Images for annotation" folder, which is in the same archive

Quality Assurance

To ensure high-quality annotations:

Maintained label consistency across all images

Verified correct classification before submission

Ensured tight and accurate bounding boxes

Followed all task rules strictly

3. Open the created task and annotate all images according to the rules described in the Task Requirement section below

4. Save the task and provide a link to the task in this form <https://forms.gle/LqcW5r3D4TDqLuoZ7>

■ Outcome

Successfully annotated all assigned images

Maintained compliance with provided guidelines

Delivered structured and high-quality labeled dataset

■ Notes

This project demonstrates practical experience in:

Computer vision data annotation

Object detection dataset preparation

Using professional annotation tools like CVAT
